

PROFESSIONAL GRADE
ODOR CONTROL

ERASES FOUL ODORS IN TEXTILES & FRESHENS THE AIR IN THE ENTIRE ROOM

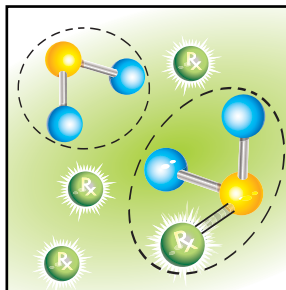

RX 20^F - FABRIC & CARPET AIR FRESHENER

The absorbent fibers in carpets, upholstery, draperies, and other textile products act as wicks to hold, and then release foul odors into the air... or they can radiate an aroma of freshness, with RX 20^F giving evidence of cleanliness and good housekeeping in the whole area where used.

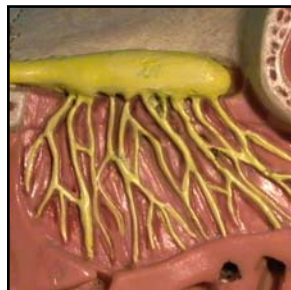

The latter is easy with RX 20^F - it contains *AIRICIDE*[®], our proprietary, proven effective odor counteractant... *AIRICIDE*[®] acts to immediately neutralize bad odors in fabrics and textile fibers so they will not fight the pleasant, long-lasting fragrance of the essential oils in RX 20^F.

RX 20^F is not a "mask" it contains *AIRICIDE*[®] Odor Counteractant....

...to change the size and shape of odorous molecules in the air....

...so cilia receptors will not recognize them as foul smelling.

Bottles and sprayers are reusable to reduce cost and save the environment.

RX 20^F FABRIC & CARPET AIR FRESHENER

USES

Tested, and when used as directed, RX 20^F is safe for use on virtually all washable textile fibers and fabrics, including upholstered furniture, draperies, carpets, bedding, clothing, etc... in hotels, motels, life care facilities, cruise ships, private and commercial airplanes, buses, trains, automobiles, etc... Excellent for deodorizing athletic equipment, gym bags... Not recommended for use on silk or leather.

Psychological studies show that facilities such as jewelry stores, hotels, car dealers and restaurants do better business when they smell fresh. Try it with RX20^F

DIRECTIONS

Set tip of sprayer to ON to deliver a fine mist. Point sprayer away from face. Test fabrics & carpets for colorfastness in an out of the way spot.

1. With side to side action spray object lightly. DO NOT OVER WET.
2. Allow object to dry thoroughly before returning it to service... Spraying fabrics & carpets will freshen the entire room.

If there are no absorbent objects in room, point sprayer toward ceiling and 2 or 3 puffs will refreshen the entire room.

DESCRIPTION

A ready-to-use, bulk (non-aerosol) spray formulated especially for institutional and commercial use to eliminate all types of foul odors in textile fabrics and fibers, and then to radiate a fresh, clean, inviting, lasting fragrance in the air throughout the entire area.

BENEFITS

CONTAINS 20% *AIRICIDE*[®] - That makes RX 20^F different and more effective. The *AIRICIDE*[®] erases existing bad odors that otherwise would fight the essential oils.

FOOL PROOF SPRAYER: Sprayers provided in each case are pre-set to deliver an ultra-fine particle size to prevent over wetting. The sprayers are loose in the case to avoid damage in shipping.

EASY TO USE: Just spray lightly with the special trigger sprayer provided.

RESISTS SOILING: Leaves no sticky residue to cause resoiling as other sprays do.

IMMEDIATE & LONG LASTING EFFECTIVENESS: The RX 20^F complex of *AIRICIDE*[®], plus essential oils solves both immediate and long term odor problems with one application.

AVAILABLE TWO WAYS: Cases of 12 quarts, (each with its own special sprayers). Keep the bottles and sprayers for refill. Saves money/protects the environment by not trashing useful items... Also 2½ gallon bag-in-a-box, (each with own mini spigot). Also includes 3 full quarts with special sprayers (equivalent of 13 quarts - one of which is free!)
