

PROFESSIONAL GRADE  
ODOR CONTROL

## HEAVY DUTY DEGREASER/CLEANER AND ODOR COUNTERACTANT TO ELIMINATE OBNOXIOUS ODORS

## RX 30 DEODORIZER/DEGREASER FOR COMPACTORS & DUMPSTERS

Specially formulated for heavy duty cleaning and degreasing of refuse containers and their surrounding areas...and for the elimination of the foul odors that are associated with them. There are no worse odors than those emanating from dumpsters, compactors, trash trucks, garbage cans, and the like. Their smell can often be so obnoxious that a person literally cannot get close enough to the problem to work on it. Now with RX 30 the problem can be solved quickly and pleasantly. A quick spray of RX 30 eliminates the foul odor. Then powerful degreasers in the formula penetrate, loosen, and emulsify grime and soil so that they can be easily flushed away. RX 30

contains no orthodichlorobenzene or other chlorinated solvents, but instead uses a potent natural solvent with superior ability to remove stubborn, greasy soil...And it contains highly concentrated *AIRICIDE® Odor Counteractant* in a unique water-release form. These odor counteractants work well enough by themselves, but when they contact moisture in the refuse, or when RX 30 is sprayed with water, the odor counteractant effectiveness is intensified to overcome the very worst of foul odors. This one product, in one operation, eliminates odors and removes their source better than any deodorizers and degreasers used separately.

Easy to use. Just fill a garden sprayer with RX 30.

Tighten the top of the sprayer and pump it up.

Spray on RX 30 from a distance to kill odors.

Water rinsing completes deodorizing and degreasing.

# RX 30 DEODORIZER & DEGREASER

## DESCRIPTION

RX 30 is a high powered, combination cleaner degreaser, deodorizer for removal of heavy, greasy soil and the foul odors that goes with them in and around refuse and trash collection and disposal equipment. Like all Airx products', it contains *AIRICIDE® Odor Counteractant*, but is unusual in that the full impact of the *AIRICIDE®* is not released until contacting, or being contacted by water. Can be used on any surface not affected by solvent degreasers.

## BENEFITS

**DEODORIZES** - Like other Airx products RX 30 contains *AIRICIDE®*, a proprietary odor counteractant that merges with foul odor molecules in the air to change their size and shape so that they are not recognized as unpleasant when they reach the nose.

**HIGHLY CONCENTRATED** - The odor counteractants contained in RX 30 are so powerful that they are effective even when diluted 500 parts to 1 (approximately one ounce in four gallons of water). A little RX 30 will go a long way.

**MOISTURE RELEASED** - Spraying with water, that dilutes and reduces the effectiveness of other deodorizers, actually accentuates the odor neutralizing ability of RX 30.

**WIDE USAGE** - Counteracts malodors from garbage, trash, fats, oils, fermentation, decay, mildew, etc. and removes the source of such odors for long lasting effectiveness.

### **AUTOMATIC DISPENSER AVAILABLE**

Contains peristaltic pump, timer with external on/off switch, wiring, tubing and spray nozzle. The unit is designed to be wired directly to the compactor's electrical feed line and to spray a stream of RX 30 into the compactor's ram opening. A solid state switch can be set so that the proper amount of product is dispensed from every 20 seconds to every 12 minutes.

## USES

For degreasing, cleaning and especially for deodorizing dumpsters, compactors, bulk trash containers, public waste receptacles, garbage cans, grease pits, trash rooms, compactor rooms, drop chutes and trash chutes, trash trucks, etc. RX 30 becomes an automatic time release spray when used with the Airx DSP dispenser attached to compactors or other collection equipment. May also be sprayed on ground below or around collection area for immediate relief from foul odors.

## DIRECTIONS

**FOR IMMEDIATE ODOR CONTROL** - Charge a garden type sprayer with concentrated RX 30 and pump up to be able to stay as far from foul odors as possible. Apply a coarse spray of RX 30 to the source of odors. Then, for maximum effect against foul odors and to make the removal of the source and final clean-up as pleasant as possible, wet down area with water.

**FOR CLEANING & DEODORIZING** - Spray on concentrated RX 30 with a garden type sprayer. Wait 3 to 5 minutes after application and then wet down with high pressure hose or pressure washer.

**FOR GROUNDS DEODORIZING** - Apply RX 30 directly into standing water or spray over area, then spray with water.

## SPECIFICATIONS

ACTIVITY ..... 100% active  
COLOR ..... yellowish liquid  
FLASH POINT ..... greater than 110°F  
SPECIFIC GRAVITY ..... 0.925 ± 0.005 gm/ml  
DENSITY ..... 7.70 ± 0.05 lb/gal  
SOLUBILITY IN WATER ..... quickly emulsifiable  
SHELF LIFE ..... 2 years minimum  
ODOR COUNTERACTANT ..... water activated *AIRICIDE®*  
VISCOSITY ..... water thin  
DETERGENT TYPE ..... non-ionic  
CHLORINATED SOLVENTS ..... none
